VANDERBILT

# ACTpro

Investment for the future

Vanderbilt ACTpro is an investment for the future: all versions of the system are backward compatible, leaving room for future system expansion or upgrades.

ACTpro provides ease and reliability for installations, increasing your profitability. The system allows you to get more completed in a day – it's engineered from first principles to speed installation and configuration

ACTpro - Simple, Flexible, Powerful

ACTpro System Integrations

ACTpro hardware, coupled with ACTEnterprise software, provides you with a vast array of integrations to ensure you get the most from your ACTpro system. At Vanderbilt, we work closely with key strategic partners to provide you with world-class integrated solutions.

FIRE ALARM

ACTpro is the industry leader in fire panel integrations. All our wired and wireless hardware components will automatically unlock in the event of a fire.

A muster report will be sent to a designated printer, and an email sent to appropriate personnel with a list of all people on site at the time of the fire.

BIOMETRIC

ACTEnterprise has integrated with leading biometric manufacturers to offer choice and flexibility.

INTRUDER ALARM

Allows the user to arm or disarm from their keypad (ACTpro 1050e) when arriving at the building in the morning or leaving at night.

LONG RANGE & THIRD PARTY READERS

Our controllers will operate with third party long range readers useful for vehicle barriers, wheelchair access or when hands-free access is required.

VIDEO

ACTEnterprise software has integrated with video manufacturers to allow you to associate doors with cameras to provide video evidence of an access control event.

TIME & ATTENDANCE

ACT Enterprise provides a time and attendance report. If greater functionality is required ACT Enterprise integrates with leading time and attendance software providers to allow you to benefit from a complete T&A system while using existing ACTpro hardware.

STUDENT/CLASSROOM ATTENDANCE (SIMS)

ACTEnterprise interfaces with student attendance systems to calculate attendance ratios and student absenteeism.

CLUB MANAGEMENT & GYM MEMBERSHIP

ACT Enterprise integrates with club management and gym membership software packages allowing customers to manage their clubs from one interface and update one database.

CASHLESS VENDING

Utilize MIFARE or MIFARE DESFire EV1 card technology to create a cashless society in your organization. Use your access control card to pay for meals, goods, and services.

FOLLOW ME PRINTING

Utilize MIFARE or MIFARE DESFire EV1 card technology to avoid print queues, track printing costs and to ensure you are at the printer when your documents are printing.
